Student Name: Aadesh Khande
Course: B.Tech Computer Engineering (FSD)
Subject: Web Technology (Lab Practical)

Topic: Personal Portfolio (HTML5 & CSS3)
Directory: `/Portfolio_FSD/`
Email: `contact@aadeshkhande.com`

Practical Assignment: Design and Development of a Responsive Personal Portfolio Webpage Using Pure HTML5 and CSS3

> **Project Deployment & Repository:**
> • Live Application: https://javascript-assignment-sable-one.vercel.app/
> • GitHub Source Code: https://github.com/debugonaut/javascript-assignment.git

1. OBJECTIVE AND STUDENT PROFILE

The objective of this assignment is to design, develop, and deliver a clean, production-ready personal portfolio webpage for **Aadesh Khande**, a Third-Year Computer Science undergraduate and full stack developer. Built strictly with **pure HTML5 and vanilla CSS3**, the portfolio demonstrates proficiency in responsive web design, semantic HTML markup, accessible interactive navigation, and minimalist visual aesthetics without reliance on external CSS or JavaScript libraries.

2. ARCHITECTURAL DESIGN & VISUAL DESIGN SYSTEM

The design language balances minimalist editorial typography with modern software showcase aesthetics:

- **Zero Runtime Dependencies:** Pure HTML5 markup and vanilla CSS3 styling with no third-party UI frameworks.
- **Design System Tokens (`:root`):** Standardized color palette including subtle backgrounds (`#ffffff`, `#fbfbfa`), soft green CTA accents (`#ebf2eb`), sunny yellow avatar badge (`#fed347`), and crisp charcoal typography.
- **Developer Portrait & Resume CTAs:** The developer portrait (`image.png`) is centered inside a yellow circle, accompanied by dual actions: "Contact Me" and "View / Download Resume" linking directly to `resume_2-2.pdf`.
- **Smooth Anchor Navigation:** Implements CSS `scroll-behavior: smooth` linking the top navigation bar seamlessly to the About, Projects, Skills, and Contact sections.
- **Zero Emojis:** Pure typographic minimalism using clean geometric icons and SVG vectors.

3. PROJECTS SHOWCASE SECTION (SOME OF MY WORK)

The Projects section highlights three authentic production systems built by Aadesh Khande, using real landing page and console screenshots as thumbnails. Each card features dedicated **Vercel Live Deployment** and **GitHub Source Code** action links:

- **1. Video Playback Tracker:** Cross-browser extension (Chrome & Firefox) and web platform that automatically tracks and preserves video playback timestamps across all streaming sites.
  - Vercel Live: https://rewind-player.vercel.app
  - GitHub: https://github.com/debugonaut/video-playback-tracker.git
- **2. Groomly:** Pet grooming marketplace and salon management platform connecting pet owners with verified local salons, smart booking, and analytics.
  - Vercel Live: https://groomly-ruddy.vercel.app
  - GitHub: https://github.com/debugonaut/Groomly.git
- **3. Thermalwatch AI:** Context-aware satellite thermal intelligence system detecting, categorizing, and monitoring industrial thermal anomalies and wildfires across India.
  - Live Deployment: https://sih26ekaant.web.app
  - GitHub: https://github.com/debugonaut/ThermalWatch-AI.git

4. CORE TECHNOLOGIES SECTION (TECHNOLOGIES I WORK WITH)

The Skills section focuses on core tools and technologies across modern full stack development. It is styled with 7 rounded cards featuring crisp, scalable SVG icons, subtle borders, and smooth hover elevation states:

- **HTML & CSS:** Semantic HTML5 structure, Flexbox, CSS Grid layouts, custom variables, and responsive media queries.
- **JavaScript & React:** ES6+ syntax, async logic, component architecture, state management, and modern client UI flows.
- **Node.js, Git & Figma:** Server-side JavaScript APIs, distributed version control, and design system wireframing.

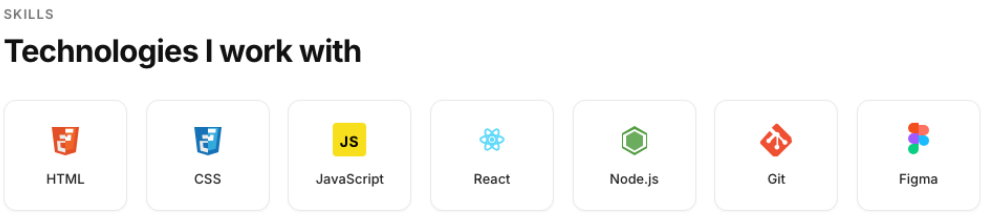

Figure 3: Technologies Section — Eyebrow (SKILLS), Heading (Technologies I work with), and 7 Official SVG Tech Cards (HTML, CSS, JS, React, Node.js, Git, Figma)

5. CONTACT SECTION & SOCIAL FOOTER

The Contact section is engineered with a modern two-column layout: editorial copy on the left inviting collaboration, and a responsive form on the right directing inquiries directly to `contact@aadeshkhande.com`. The section terminates in a clean footer featuring copyright metadata and vector social icons:

- **Form Elements:** Responsive two-column input row for Name and Email, full-width Message textarea, and a high-contrast dark submit button.
- **Social Links:** Direct links with SVG icons for GitHub (`https://github.com/debugonaut`), LinkedIn (`aadeshkhande`), and direct email to `contact@aadeshkhande.com`.

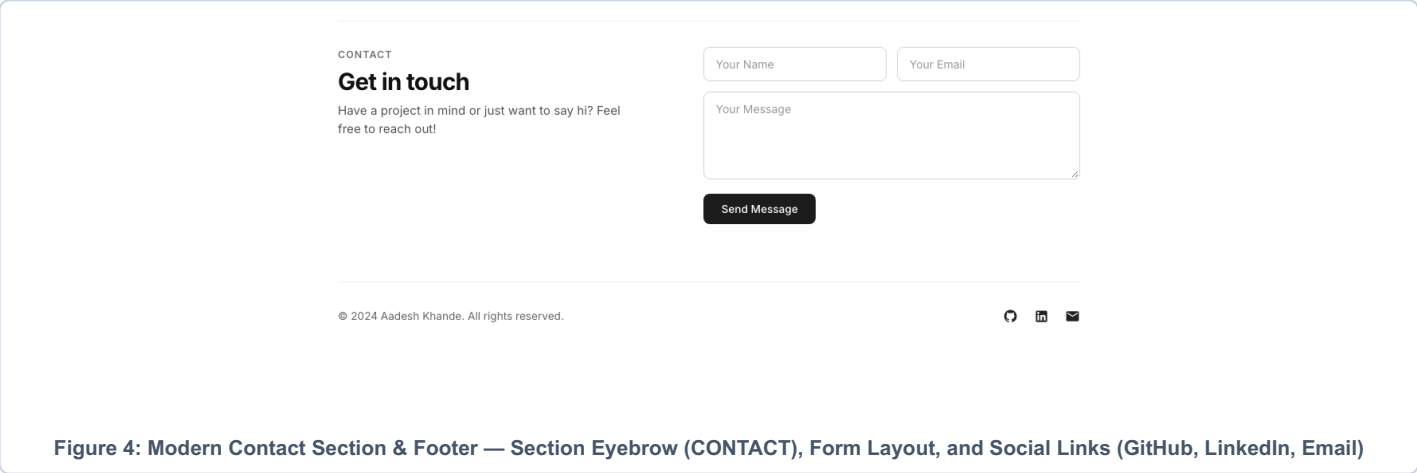

Figure 4: Modern Contact Section & Footer — Section Eyebrow (CONTACT), Form Layout, and Social Links (GitHub, LinkedIn, Email)

6. MULTI-DEVICE RESPONSIVE VERIFICATION (MOBILE & TABLET)

The portfolio adapts seamlessly across mobile, tablet, and desktop viewports using CSS media queries (`@media (max-width: 880px)` and `@media (max-width: 640px)`). On mobile screens, the hero rearranges into a centered flow with the circular portrait at top, project cards stack vertically, input fields collapse into single columns, and all touch targets adhere to accessibility standards (>44px):

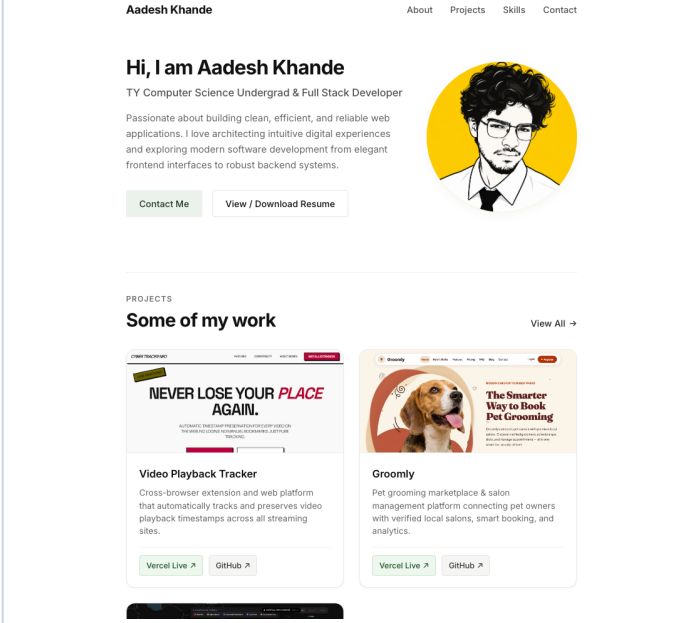

Figure 6: Tablet Viewport (iPad 768x1024) Fluid Responsive Two-Column Layout

7. KEY IMPLEMENTATION CODE HIGHLIGHTS

The codebase showcases clean semantic structure, custom CSS variables, and modular card styling:

```
/* Project Card Action Links & Responsive Grid */ .projects-cards-row { display: grid; grid-template-columns: repeat(3, 1fr); gap: 1.5rem; } .card-links-row { display: flex; align-items: center; gap: 0.55rem; margin-top: auto; padding-top: 0.75rem; border-top: 1px solid #f0f0ee; flex-wrap: wrap; } .card-link-live { background: #edf7ed; color: #1f5127; border: 1px solid #cbe5cc; } .card-link-github { background: #f5f5f4; color: #333333; border: 1px solid #e5e5e3; } @media (max-width: 880px) { .projects-cards-row { grid-template-columns: repeat(2, 1fr); } } @media (max-width: 640px) { .projects-cards-row { grid-template-columns: 1fr; } }
```

8. SUMMARY OF TECHNICAL ACCOMPLISHMENTS & CONCLUSION

- **100% Pure HTML5 & CSS3:** Built entirely without client-side JavaScript libraries, CSS frameworks, or runtime builders, achieving instantaneous load times and zero layout shifts.
- **Real Portfolio Projects:** Showcases Video Playback Tracker, Groomly, and Thermalwatch AI with authentic landing page thumbnails and active Vercel / GitHub links.
- **Production-Grade Polish:** Personalized directly for Aadesh Khande (TY CS Undergrad), with resume access (`resume_2-2.pdf`) and direct email integration (`contact@aadeshkhande.com`).
- **Full Device Responsiveness:** Rigorously verified across desktop (1280px), tablet (768px), and mobile (390px) viewports with zero layout bugs.
